1 Conference & Lecture: 4th Government IT Modernization

New IT development is limited by the fact that 90% of IT budgets is spent on maintenance of legacy systems. To enable projects to reduce the cost of maintenance, the US Federal Government has promised US\$ 90 Billion for Government IT Modernization for its organisations. To share strategies, solutions and experience the [4th Government IT Modernization conference](#) will be held April 26-28 in Washington DC, USA.

Delta Software Technology GmbH has been contacted by IQPC to contribute to the conference. Reg Mulder will attend the conference and present information about our successful IT Modernizations projects from the last decade:

Friday, 28.04.2017
 14:15 - 15:00

“Enabling New Technologies,
 Reducing Costs and Improving
 Quality Through Automated
 Software Modernization”

2 Clean Up Your COBOL-, PL/I- and Delta ADS Applications

AMELIO CleanUp-Factory

Flexibility and fast adaptability of core applications are prerequisites for an optimal software support of business processes. COBOL, Delta ADS and PL/I applications have grown over decades; they have been extended and adapted to new requirements. This has reduced the maintainability of the applications and significantly hinders their further development.

With the AMELIO CleanUp Factory by Delta Software Technology you can quickly and securely clean up your COBOL and PL/I as well as Delta ADS applications and thus regain the flexibility and adaptability of your core applications.

[Clean up your applications securely with AMELIO CleanUp-Factory...](#)

3 The Perfect Solution for a Secure Replacement of IMS Databases: AMELIO Modernization Platform

Companies who want to replace their IBM IMS databases with relational databases are facing an enormous challenge. Since this always concerns critical core applications, the most important aspects are security and the possibility of parallel development.

With AMELIO Modernization Platform, Delta Software Technology provides a safe and very flexible solution for such complex modernisation projects.

4 Support information: New Product Versions available

We have released new versions of the following products:

- ADS 6 for COBOL 6.1.7
- ADS on Eclipse 6.7.5

Schedule the update of your Delta products now. You can find more information about new features and fixes in the release notes at the support area of our website...

5 GI-Workshop „Software-Reengineering & Evolution“

Software reengineering and evolution are core aspects to preserve the benefits and value of large software systems while requirements and environment conditions are changing constantly.

Gesellschaft für Informatik

To address this issue the German Informatics Society (Gesellschaft für Informatik (GI)) organises the main German speaking reengineering conference. This conference takes place together with the Workshop “Design For Future” (DFF 2017) of the working group “Long-living Software Systems”.

**GI: 19. Workshop
Software-Reengineering & Evolution**

08 – 10 May 2017, Bad Honnef, Germany

Delta Software Technology will present possibilities to regain the application knowledge implemented in the software systems.

Lecture: “Understanding COBOL and PL/I Applications Automatically” (in German)

As applications grow old, their maintenance, evolution and modernisation become more and more difficult. The knowledge about the applications is draining over time.

Regaining that knowledge is not that simple due to the size and complexity of such applications.

Therefore, AMELIO Logic Discovery helps you to regain the knowledge implemented in COBOL and PL/I applications with 100% automation.

Our Speaker

Dr. Daniela Schilling

Dr. Daniela Schilling is CEO of
Delta Software Technology.

You can't participate? Please contact us to discuss
the topic and solutions directly.
